

Charge Point Management System (CPMS)	Yes	Although the feature lists of our competitors are not nearly as comprehensive.
Hardware agnostic: 200+ Supported charge point models	Unknown	Huge lack of transparency: Most competitors do not clearly publish their list of supported models like we do
Free hardware integration upon request	No	Competitors usually require hardware manufacturers to pay a fee for integrating their charge points. We never do.
Wallet / Integrated payment system	Yes	
Ability for site owners to manage charge points themselves	No	In the majority of cases, operators cannot transfer control of the charge point to site-owners after setting it up. At Monta, we give you this flexibility.
Self-healing - our software automatically detects and fixes bugs	Yes	97,8% successful charges with Monta is a figure that speaks for itself.
Load Balancing	Yes	Dynamic and True Dynamic Load Balancing is supported by Easee, ABB, Wallbox & Enelion.
Partners can offer additional services to their clients in the Portal	No	This is a native feature in the Monta Portal whereas in other solutions, these agreements have to be implemented outside the backend system.
Peer-to-Peer Function - Sharing your charger	Yes	
Decide who can use your charge points, when and at what cost	No	None of the other solutions provide the same degree of flexibility in customizing a charge point's accessibility.
Car integration	No	We make this option available for both fleet managers and EV drivers.
Versatile App for EV drivers	Yes	However, with Monta you can not only use the app for charging, but for setting up your charging preferences as well. We also make themed apps.
Set your own charging preferences	No	Our Smart Charging feature enables EV drivers to charge when the cost of electricity is lowest or when energy is greenest.
Charge Point Roaming in Europe	Yes	More than 175.000 charge points in our roaming network.
QR Code + Instant Charge via App Clips	No	Competitors require EV drivers to always download an app before accessing the charge point or force them to buy a charge key. We don't ask for that.

And a lot more is coming...
